

ASX Announcement

21 September 2020

Business Update

Eagle Health Holdings Limited (ASX: EHH) ("Eagle Health" or "Company") wishes to provide its shareholders an update on its China operations and the impact COVID-19 has had on segments of the business.

1. EHH Business Environment

Sales of traditional products

The Covid-19 pandemic has seriously impacted the Chinese economy in general and China's health supplements market. Pharmacies, supermarkets and other retail stores have all experienced significant falls in sales and customer traffic during the first six months of 2020 due to the nationwide lockdown.

As a consequence, the Eagle Health's China operations management by its wholly own subsidiary Xiamen Eagledon Pharmaceuticals Co Ltd ("Eagledon") have been adversely affected by the pandemic. Sales stagnated, supply chains and logistics slowed down, production scaled back, therefore the marketing campaigns suspended and outlet expansion postponed.

In the first half of 2020, sales of health supplements decreased significantly by 61% (unaudited) compared to the same period of 2019.

New market opportunity

In an effort to mitigate against this adverse impact on its traditional sales channels, the Company has identified a new market opportunity in the production and sale of personal protective products and has made a strategic move to manufacture and sell face masks from its existing production facility in Xiamen, China by Eagledon.

Leveraging the company's experience in the health supplements market and the existing GMP certified manufacturing facilities, the Company commenced trial production of face masks in late February, after the production approval was granted by National Medical Products Administration NMPA (formerly CFDA) .

Eagledon now has 20 face mask production lines in operation including a capability to produce N95 face masks.

Eagledon has received accreditation from the following bodies in respect of its face mask business (copies of certificate attached to this announcement):

- Australian TGA- Medical Device Class 1 (Annexure A)
- US FDA- Medical Device listing (Annexure B)
- China- Medical Device Registration Certificate of the People's Republic of China. (Annexure C)

Eagledon has identified and engaged below opportunities so far:

- Demand from China local government and authorities
- Demand from China based large organisations i.e. China Oil
- Demand from China based large pharmaceutical companies i.e Hainan Yiling Medical
- Eagledon has also signed a 12 month supply agreement with a Hong Kong based supply chain in May 2020 for its international market
- Eagledon also supplied to Australian based pharmaceutical company

Eagle Health Holdings Limited

A summary of Eagledon's face mask supply (unaudited):

Customer category	Orders by 30 June 2020		Delivered by 30 June 2020	
	quantity in '000	revenue RMB in '000	quantity in '000	revenue RMB in '000
Local government and authority	114	205	114	205
China based large organisations	7,900	11,815	6,662	8,100
China based large pharmaceuticals	26,009	52,633	29,009	52,633
International market other than Australia	8,627	15,828	8,627	9,200
Australia market	1,750	2,990	1,750	2,990

Until 30 June 2020 Eagledon has manufactured and supplied face masks of approx. 56 million in quantity and recognised RMB74 million in revenue (unaudited). With cash receipts of \$50 million RMB by 30 June 2020 and 73.56 million RMB by 31 August 2020 (unaudited).

The Company expects that the face masks market will continue to grow in China and internationally, and the health supplements market in China will slowly recover. The Company will therefore focus on this growing face mask opportunity whilst at the same time seek to recover lost sales in health supplements.

Where opportunities are identified, the Company intends to expand its presence in this personal protective product category.

2. Audit Status

The 2019 annual audit is still not complete. The Board had resumed conversation with the Company's external auditor Grant Thornton in terms of pending matters and completion time. The Board will advise the shareholder as soon as we receive any confirmation from Grant Thornton.

3. Annual General Meeting

Because the Company has been unable to present audited accounts to shareholders, the Board has decided to defer convening an Annual General Meeting until such accounts are available. In the meantime, the Board is considering to hold an investors call session once the 2019 annual audit is close to completion.

Approved for release by the Board of Directors.

-ENDS-
